

WHO?

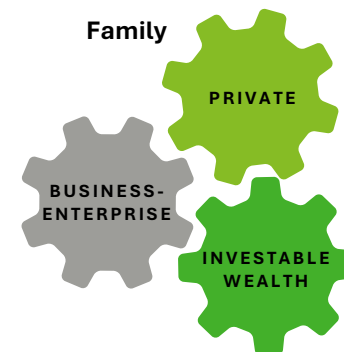

Collaboration of lawyers/ legal specialists and psychologists: experts in governance, communication, group dynamics, facilitation and mediation

HOW?

We facilitate processes for growth, mutual trust, understanding and respect in the family. Our process-oriented approach is developing the concrete needs of the family into a customized and flexible trajectory. Step by step, at the pace of the family, we come to concrete agreements, thoughtful and with buy-in of all family members. The entire family works together on continuity and sustainability of the company as well as family harmony. Family members develop skills, competences and tools to deal with challenging situations in the future, as a business family.

GOAL?

We work towards more family harmony and sustainable shareholdership, for every family member to find their role that suits best.

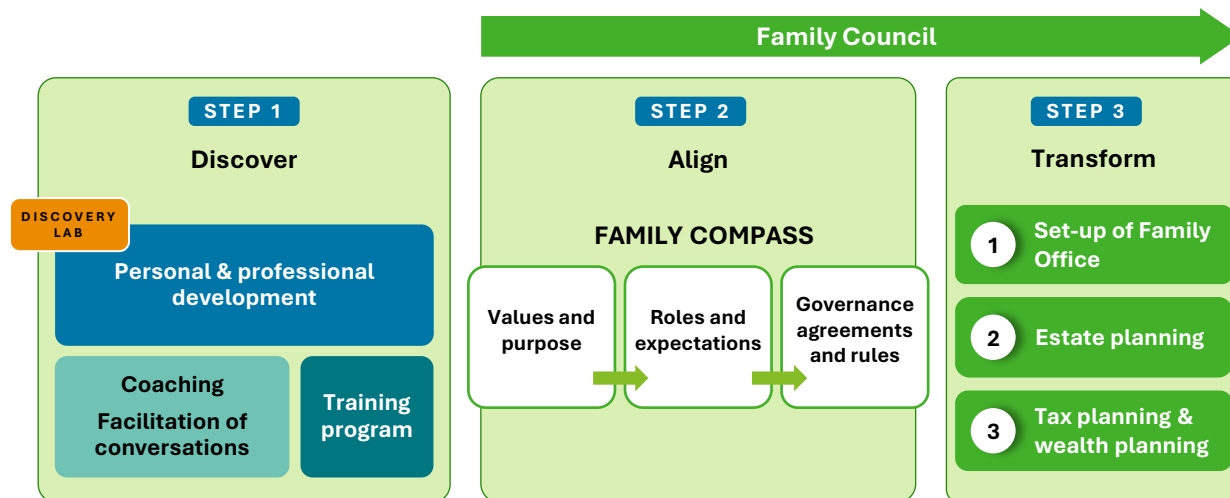

With FBDG we counsel and guide entrepreneurial families in their challenges related to family, business and investments, and the interaction between all of these:

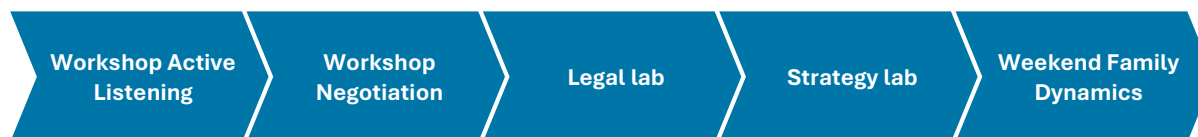

- How do I best arrange succession of wealth and responsibilities?
- How to better educate my children to handle the family fortune with care?
- How to become responsible and sustainable shareholders?

We challenge you to reflect on the following questions:

- How do you handle conflicts as a family?
- Do you organize family councils on a regular basis to discuss urgent or important topics?
- Do you, as a family, have a clear and shared vision on the future of your business?
